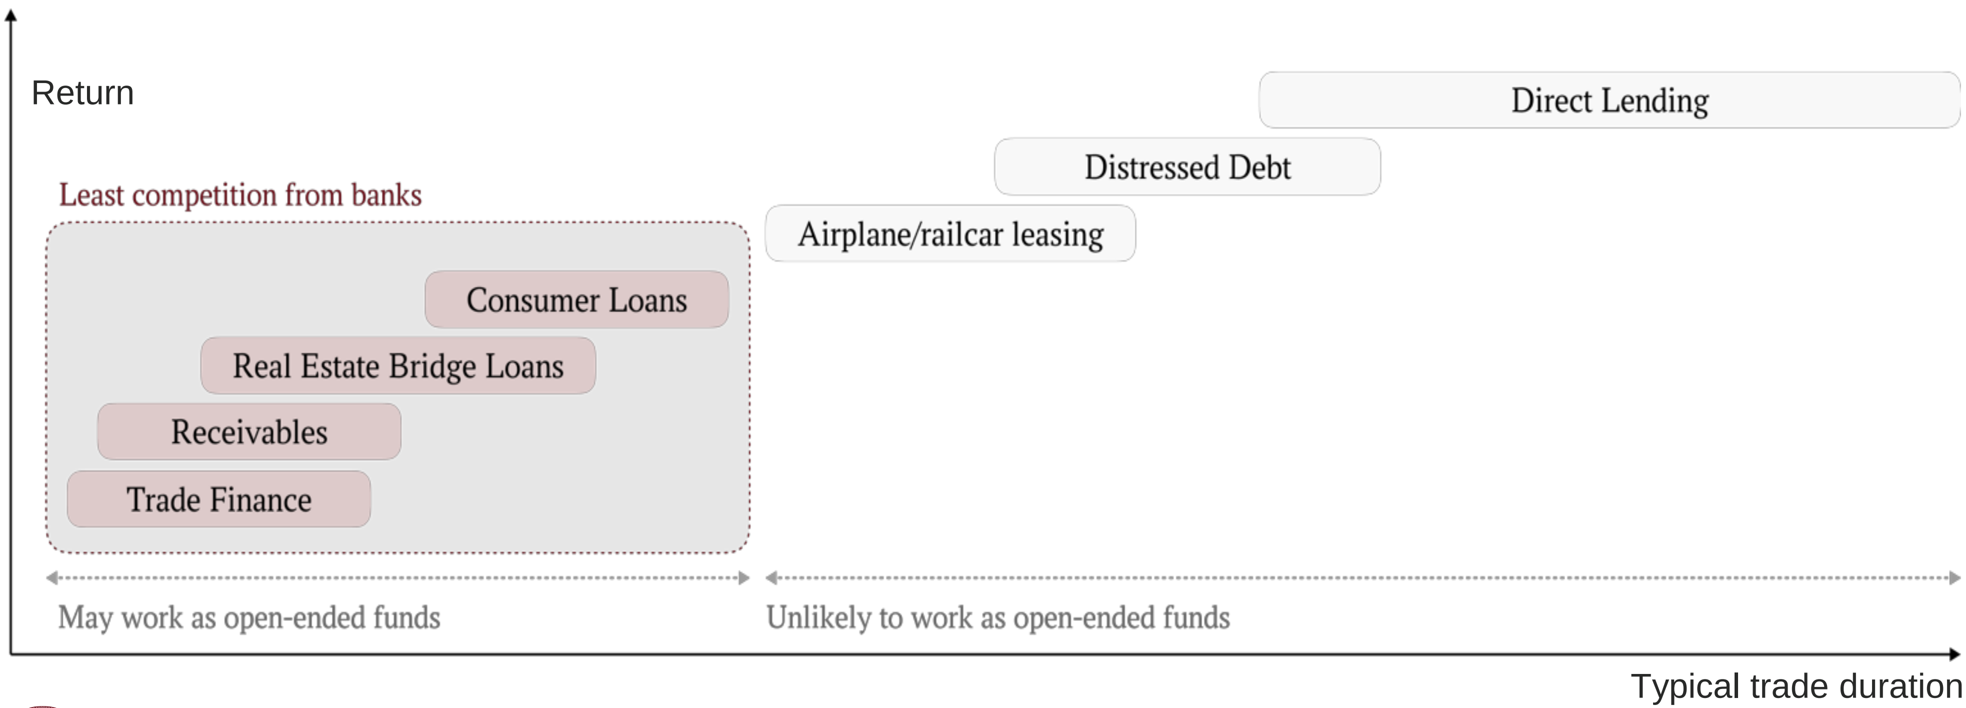
Why Private Credit: A structural trend

- **Banks retreating:** Post 2008, commercial banks scaled back their lending activities due to high capital reserve requirements (Basel III) and high compliance costs (Dodd-Frank), concentrating on large transactions only
- **Funds stepping in:** Alternative private credit features strong collaterals and relatively liquid assets
- **Inflation hedge:** Private loans are often issued at variable rates and reset frequently



Private Debt has never had a negative 5y return

Why Arbitrage: Volatility returns

Arbitrage means profit opportunities without market risk

- Deviating prices of the same asset on different exchanges: copper in London, vs. copper in Shanghai
- Deviating prices of substitutes: volatility of an equity index, vs. volatility of a basket of largest stocks in the index
- Yield of a 6-year US Treasury bond, vs an average of 5-year and 7-year yields

Arbitrage thrives on volatility

- Trade wars and geopolitics
- Uneven policy response & sensitivity to generational challenges such as Covid and inflation

Arbitrage perfectly complements equity portfolios

- *Example from our portfolio:* 2019 and 2021 – unexciting years for this strategy (still firmly positive)
- But in 2018, 2020 and 2022 equities were weak and volatile – while this low-risk strategy returns 8% on average

Our Investment Process

1 Primary Screening → **2** Preliminary Due Diligence → **3** Detailed Due Diligence → **4** Portfolio construction

1 Primary Screening

100 funds each year

- Top-down review of niche strategies and selection of strong performers within each strategy
- Bottom-up ideas coming from peer fund selectors, dedicated magazines and conferences
- New funds launched by asset managers with proven record and established relationships

2 Preliminary Due Diligence

50 funds each year

- Calls with fund managers
- Strategy analysis: Returns, leverage, Sharpe ratios, typical deal economics
- Competitive advantages
- Preliminary operational Due Diligence based on fund documents
- Conformity check of legal structure

3 Detailed Due Diligence

15-20 funds each year

- Follow-up calls with fund managers
- Calls with risk management
- Extended operational Due Diligence
- Detailed analysis of legal structure
- Cross-checks with institutional investors in the fund

4 Portfolio construction

12-20 top funds

- Overweight stable strategies, but hard limit of 12% per asset manager, 10% per fund
- Constant communication: ad-hoc calls in case of unusual performance or adverse events
- Direct access to fund PMs due to large investment and long-term relationships
- Access to soft-closed funds

Risk Management: Strict checks on position level

Liquidity gap risks *Could the manager ever be forced to sell at fire prices?*

- Niche-specific: pre-committed financing, crisis patterns in supply/demand
- Fund-specific: leverage, redemption rules
- Look for «hard to badly mismanage» opportunities

Market risks *How vulnerable is the fund to major global dislocations?*

- Funds should explicitly manage drawdown risks
- The strategy should not have hidden beta to markets via derivatives

Performance risk *What risk premium(s) is the strategy collecting?*

- Which structural or regulatory arbitrage drives outsized returns?
- Is asset valuation transparent? Has the manager incentives or ability to misrepresent valuation?
- Obligatory cross-checks with peer fund managers and large institutional investors
